Basel III Common Equity Tier I Disclosure

1. Background and Scope

The Bank of Botswana Directive on Revised International Convergence of Capital Measurement and Capital Standards for Botswana (Basel II Guidelines) (hereinafter referred to as “the Standards”) read in conjunction with Sections 13, 18 and 48 of the Banking Act (CAP 46:04) effective 1st January 2016, outlines the need for banks to have a Pillar III disclosure (Market Discipline).

Section 12.1 and 12.2 of the directive stipulates the objectives of this disclosure as shown below;

- *The Primary purpose of Pillar III is to supplement the minimum capital requirements (Pillar II) by introducing a set of disclosure requirements, which allow market participants to influence the level of capital, risk assessment processes, capital adequacy and remuneration practices of a bank.*
- *Improved transparency, underpinned by high quality and timely market disclosures, will enhance market discipline, efficiency and confidence. The key objective is, therefore, to provide a market driven incentive for a bank to conduct business in a safe and sound manner. A bank is, therefore, responsible, beyond the disclosure requirements set out in this Directive, for Conveying adequate information regarding its actual risk profile and how these risks relate to capital.*

1.1 Summary and Approach

The Bank Gaborone Pillar III report will focus on disclosures for the period ended March 2022 and is therefore not the detailed year-end report. This, adequately covers the disclosure requirements as stated in the Basel II guidelines to ensure market participants have sufficient information to effectively assess key information relating to the bank’s regulatory capital and risk exposures.

2. Revised Bank Regulatory Capital Structure

The Directive on Revised International Convergence of Capital Measurement and Capital Standards for Botswana amended some of the regulatory capital thresholds on 1st April 2020 as a form of capital relief to banks. The initiative was also to provide additional liquidity support measures to enable banks to address the liquidity challenges during these extra ordinary times and to continue to support economic activity in the context of the adverse impact of the coronavirus (Covid-19) pandemic. *Source: Bank Of Botswana Circular No.2 to Banks.*

Each Bank is now required to hold the minimum level of the regulatory capital of P5 million, as well as to maintain the following capital adequacy ratios:

Pillar III Disclosure

For Quarter Ended 31 March 2022

- Tier 1 and Tier 2 capital to risk weighted assets at a minimum of 12.5 % (previously set as 15 %), referred to as capital adequacy ratio.
- Tier 2 capital to Tier 1 capital limited at a ratio of 50 % in the determination of capital adequacy.

The bank's regulatory (qualifying) capital is divided into two tiers:

- Tier 1 capital: stated capital and distributable reserves;
- Tier 2 capital: qualifying subordinated loan capital, collective impairment allowances and unrealized gains arising on the fair valuation of equity instruments held as available for sale.

The bank has adopted the standardized approach to Basel II effective from 1st January 2016, with risk-weighted assets being measured at three different classes: operational risk, market risk and credit risk. A summary of the bank's capital elements, as well as the various risk weighted assets are briefly discussed in the following sections of this report.

3.1 Qualitative Disclosures: Capital Ratios

For the Quarter Ended 31st March 2022, the bank's key capital ratios were above the minimum regulatory ratios. The ratios were as follows;

Capital	Minimum prudential Ratio (Regulatory)	Reported Ratio
Common Equity Tier 1 Capital (CET 1)	4.5 %	8.52 %
Tier 1	7.5 %	8.52 %
Total Unimpaired Capital (CAR)	12.5 %	15.08 %

3.2 Quantitative Disclosures

Below is the breakdown of the bank's Risk Weighted Assets, followed by a detailed breakdown of the risk classes

Risk Class	Methodology Used	Amount (P'000)
Credit Risk	Credit RWA (Simple Approach)	5,390,238
Market Risk	Market RWA	23,526
Operational Risk	Operational RWA (BIA)	274,460
TOTAL RWA		5,688,224

4. Credit Risk Management

Capital Requirements Credit Risk (RWA)

Credit risk is expressed as the risk that a borrower or counterparty will fail to meet an obligation when it falls due, and is inherent to the bank's business activities. The realization of credit risk can cause a considerable loss in revenue as well as a decline in the total asset value when assets are categorized as non-performing. Bank Gaborone uses the Simple approach as per Basel II guidelines when calculating the Credit Risk RWA. The RWA is the addition of the totals of both ON and OFF balance sheet portfolios, subject to various mitigations.

Pillar III Disclosure

For Quarter Ended 31 March 2022

Risk-Weighted Amounts (On-Balance Sheet Exposures)	Total Risk Weighted Assets	Minimum Capital Requirement
Claims on Sovereign or Central banks	-	-
Claims on Banks	477,994	59,749

Risk Weighted Amounts (Off Balancesheet Exposures)		
Commitments that are unconditionally cancellable at any time without prior-notice or that effectively provide for automatic cancellation due to a deterioration in a borrower's credit worthiness.	-	-
Corporates	71,910	8,989
Total Off-Balance Sheet Amount	71,910	8,989
Total Risk Weighted Assets	5,390,238	673,780

5. Market Risk

Capital Requirements Market Risk (RWA)

Market risk is the exposure to adverse changes in the price or value of an instrument traded or held as an investment. Where market risk is a factor, and especially in volatile markets, the practice of marking to market on a regular basis is an important discipline.

From the above the following detailed risks arise:

- Interest rate risk: the risk of loss resulting from changes in interest rates, including changes in the shape of yield curves.
- Currency risk: also known as foreign exchange risk, which arises from fluctuations within the currency market.
- Basis risk: the change in price basis or spread between two rates or indices changes, e.g. the price of an asset does not change in the same manner as a change in a liability, or the spread between the funding and lending rate changes.

Pillar III Disclosure

For Quarter Ended 31 March 2022

Bank Gaborone uses the Standardized Measurement Method (SMM) where a standardized supervisory capital charge is applied separately to each risk category and aggregated to derive the market risk capital charge.

Risk Category	RWA	Minimum Capital Requirement
Market Risk RWA	23,526	2,941

6. Operational Risk

Capital Requirements Operational Risk (RWA)

Operational Risk is the risk of the bank suffering financial losses directly or indirectly due to failed internal processes or systems, human error or from external events.

Bank Gaborone adopted the Basic Indicator Approach (BIA) when calculating its operational RWA. The regulatory charge for operational risk will be equal to 15 percent of the average of the previous three years bank's positive annual gross income. The three-year average gross income is calculated on the basis of the last three 12 monthly observations at the end of the financial year. When audited figures are not available, the submitted returns may be used.

Risk Category	RWA	Minimum Capital Requirement
Operational Risk	274,460	34,308

7. Balance Sheet Accounting (IFRS) VS Regulatory

There are no differences in our IFRS and Regulatory reporting figures. The only difference is due to the way Impairment is reported in our IFRS and Basel II Return.
