### Basel III Common Equity Tier I Disclosure

#### 1. Background and Scope

The Bank of Botswana Directive on Revised International Convergence of Capital Measurement and Capital Standards for Botswana (Basel II Guidelines) (herein referred to as “the Standard”) read in conjunction with Sections 13, 18 and 48 of the Banking Act (CAP 46:04) outline the need for banks to have Pillar III disclosures (Market Discipline).

Section 12.1 and 12.2 of the Standard stipulates the objectives of Pillar III disclosures as follows:

- To supplement the minimum capital requirements (Pillar II) by introducing a set of disclosure requirements, which allow market participants to influence the level of capital, risk assessment processes, capital adequacy and remuneration practices of a bank.
- Improved transparency, underpinned by high quality and timely market disclosures, enhancing market discipline, efficiency, and confidence. The key objective is, therefore, to provide a market-driven incentive for a bank to conduct business in a safe manner. A bank is, therefore, responsible, beyond the disclosure requirements set out in the Standard, to convey adequate information regarding its actual risk profile and how the risks relate to capital.

#### 1.1 Summary and Approach

Bank Gaborone’s Pillar III report focuses on disclosures for the period ended 31st December 2023 and is not a detailed year-end report. The report adequately covers disclosure requirements stated in Basel II guidelines and aims at giving market participants sufficient information relating to the Bank’s Regulatory Capital and Risk Exposures.

#### 2. Revised Bank Regulatory Capital Structure

Effective 1st April 2020, Bank of Botswana amended some of the regulatory capital thresholds as a form of capital relief to banks. The relief aimed at providing additional liquidity support measures to enable banks to address the challenges brought by Coronavirus (COVID – 19) Pandemic.

### 2.1. Regulatory Capital

- Tier 1 Capital (CET 1), going concern capital is defined as the portion of capital that is permanently and freely available to absorb unanticipated losses without the bank being mandated to cease trading. CET 1 Capital is composed of stated capital and distributable reserves.
- Tier 2 Capital provides loss absorption on a gone-concern basis and is composed of: qualifying subordinated debt capital, collective impairment allowances, unrealized gains arising on the fair valuation of equity instruments held as available for sale and unpublished profits.

The Bank is required to hold minimum regulatory capital of P5 million and in addition, comply with Capital Adequacy Measurement ratios cited below:

- Total Unimpaired Capital (Tier 1 and Tier 2) to Risk-Weighted Assets limited to a minimum of 12.5 %
- Tier 1 Capital to Total Unimpaired Capital limited to a minimum of 50 %
- Tier 2 Capital to Total Unimpaired Capital limited to a maximum of 50 %

Operational Risk	Operational RWA (BIA)	331,359
<b>TOTAL RWA</b>		<b>7,369,840</b>

## 4. Credit Risk Management

### Capital Requirements Credit Risk (RWA)

Credit risk is the risk that a borrower or counterparty will fail to meet obligations when they fall due and is inherent to the bank's business activities. The realization of credit risk can cause a considerable loss in revenue as well as a decline in the total asset value when assets are categorized as non-performing. Bank Gaborone uses the Standardized Approach (SA) on the measurement of capital charge for credit risk as prescribed on Basel II guidelines.

# Pillar III Disclosure

## For Quarter Ended 31 December 2023

The SA incorporates both On-Balance and Off-Balance exposures in calculation of Total Credit Risk-Weighted Assets, applying simple approach on Credit Risk Mitigations (CRMs). The table below shows Bank Gaborone's Credit Risk Weighted Assets and Minimum Capital Requirement as of 31st December 2023.

<b>TOTAL RISK WEIGHTED ASSETS</b>	<b>7,020,391</b>	<b>877,549</b>

## 5. Market Risk

### Capital Requirements Market Risk (RWA)

Market risk is the exposure to adverse changes in the price or value of an instrument traded or held as an investment. Where market risk is a factor, and especially in volatile markets, the practice of marking to market on a regular basis is an important discipline.

From the above the following detailed risks arise:

- Interest rate risk: the risk of loss resulting from changes in interest rates, including changes in the shape of yield curves.
- Currency risk: also known as foreign exchange risk, which arises from fluctuations within the currency market.

# Pillar III Disclosure

## For Quarter Ended 31 December 2023

- Basis risk: the change in price basis or spread between two rates or indices changes, e.g., the price of an asset does not change in the same manner as a change in a liability, or the spread between the funding and lending rate changes.

Bank Gaborone uses the Standardized Measurement Method (SMM) where a standardized supervisory capital charge is applied separately to each risk category and aggregated to derive the market risk capital charge. The table below shows Bank Gaborone's Market Risk Weighted Assets and Minimum Capital Requirement as of 31st December 2023.

Risk Category	RWA	Minimum Capital Requirement
Market Risk RWA	18,089	2,261

### 6. Operational Risk

#### Capital Requirements Operational Risk (RWA)

Operational Risk is the risk of the bank suffering financial losses directly or indirectly due to failed internal processes or systems, human error or from external events.

Bank Gaborone adopted the Basic Indicator Approach (BIA) in calculation of Operational RWA. The regulatory charge for operational risk is equal to 15 percent of the average of the previous three years bank's positive annual gross income. The three - year average gross income is calculated based on the last three twelve monthly aggregations. The table below shows Bank Gaborone's Operational Risk Weighted Assets and Minimum Capital Requirement as of 31st December 2023.

Risk Category	RWA	Minimum Capital Requirement
Operational Risk	331,359	41,420
